

TRAINING ACTIVITIES

Objectives

Between April 23 and 26, 2024, the management team of Corporación ATAMOSTEC visited the team of the National University of Colombia (UNAL), for a knowledge exchange activity. This activity includes the following objective:

- To put forward what ATAMOSTEC is doing related to the photovoltaic sector and UNAL related to the energy transition in Colombia within the framework of the “Energy 2030” initiative.
- To identify synergies and complementary activities and visualize possible cooperation that can be established seeking to achieve the objectives of the CACTUS project.
- To share ATAMOSTEC's experience in the implementation, operation and management of outdoor testing facilities for photovoltaic technologies.

Results

As a result of the experience exchange, the following results were obtained:

- A cooperation between ATAMOSTEC and UNAL to enable new services for energy companies in Colombia.
- An action plan for the development and testing of single-axis solar tracking systems in high irradiance tropical and desert conditions.

Training Activity	Colombia worckshop La Paz outdoor solar platform
Date	April 23 and 26, 2024
Number of attendees	10
Place and country	Medellin and La Paz, Colombia
Consortium Partners involved	ATAMOSTEC, UNAL
